Introduction . . . . .	5
1 Work motivation: empirical questions and behavioral hypotheses	14
1.1 Post-Taylorism Work organizations . . . . .	16
1.1.1 The performances of pTWO . . . . .	18
1.1.2 The empirical analysis of pTWO performances and of the human resources management practices which accompany them . . . . .	27
1.1.3 PTWO and the economics of the employment relation . . . . .	35
1.2 The empirical bases of behavioral approaches of work motivation . . . . .	44
1.2.1 The results of experimental economics . . . . .	44
1.2.2 The results of attitudinal surveys: work satisfaction an motivation	49
1.2.3 The interpretation of behavioral evidence: the results of ...eld studies	56
Summary and conclusion . . . . .	59
2 Theoretical behavioral analyses of work motivation	61
2.1 Behavioral microeconomic analyses of work motivation . . . . .	63
2.1.1 Intrinsic motivation and the problem of crowding out . . . . .	63
2.1.2 Cognitive leads to analyse the employment relation . . . . .	66
2.2 Theoretical analyses of the employment relation relying on social psychology	71
2.2.1 A behavioral e¢ciency wage theory . . . . .	71
2.2.2 Social status and relative wage . . . . .	72

2.2.3	Mood, motivation and effort at work: the theoretical analysis of Bewley (1999) . . . . .	73
2.3	The notion of identity as a tool for economic analysis . . . . .	74
2.3.1	The link between identity and utility . . . . .	75
2.3.2	Socio-demographic identities and employment . . . . .	79
2.3.3	Identity and the economics of organization: the theme of corporate culture . . . . .	84
	Summary and conclusion . . . . .	89
3	Employment relation in the presence of self-esteem motivations	91
3.1	Identity building, and the employment relation . . . . .	95
3.1.1	Effort and production . . . . .	95
3.1.2	Self-esteem and identity in the workplace . . . . .	96
3.1.3	The contracting game . . . . .	98
3.2	Self-esteem motivations and the profitability of employment relation . . .	101
3.2.1	The profitability of the employment relation under complete infor- mation . . . . .	101
3.2.2	Job characteristics, self-esteem concerns, and the profitability of effort . . . . .	101
3.2.3	The profitability of the employment relation for jobs with moral hazard . . . . .	105
3.3	Efficiency and self-esteem motivations . . . . .	109
3.3.1	Efficiency gains due to the intrinsic motivation accompanying the workplace identity . . . . .	109
3.3.2	Relative attraction of the out-of-the-workplace identity and efficiency	110
3.3.3	The gain in efficiency as a function of the degree of demands of jobs under consideration . . . . .	111
	Summary and conclusion . . . . .	113
	Appendix . . . . .	116

3.4	Optimal contracts under complete information . . . . .	117
3.5	Optimal contracts with moral hazard . . . . .	119
3.5.1	The lowest expected transfer inducing $e = 1$ and identity $A$ . . . .	120
3.5.2	The lowest expected transfers inducing $e = 1$ and the identity $B$ .	123
3.5.3	The principal's choice . . . . .	125
3.6	The analysis of the loss in efficiency resulting from moral hazard . . . . .	127
3.6.1	The case of a high relative intensity of the effort prescription . . .	128
3.6.2	The case of an intermediate relative intensity of the effort prescription	129
3.6.3	The case of a low relative intensity of the effort prescription . . .	131
4	Self-esteem achievement strategies and socio-demographic disparities in the labor market	133
4.1	Socio-demographic disparities in the labor market . . . . .	135
4.1.1	Earnings disparities in the labor market . . . . .	135
4.1.2	Hiring discrimination and occupational segregation in the labor market . . . . .	140
4.2	Self-esteem achievement through work and socio-demographic disparities	147
4.2.1	Differentiated socialization, stereotypes and self-esteem achieve- ment strategies . . . . .	150
4.2.2	Motivation-based profitability and selective hiring under complete information . . . . .	156
4.2.3	Profitability, and selective hiring with moral hazard . . . . .	164
4.3	A motivation-based theory of selective hiring which generates statistical earnings disparities . . . . .	170
4.3.1	A model of seeming hiring discrimination . . . . .	170
4.3.2	The interpretation of micro evidence . . . . .	171
4.3.3	Accounting for statistical realities . . . . .	173
4.3.4	Further evidence consistent with our modelling: jobs description, and the distribution of socio-demographic groups . . . . .	176

4.3.5	Some added value to other micro theories? . . . . .	179
	Summary and conclusion . . . . .	182
	Appendix . . . . .	184
5	Strategic interactions in the labor market, self-esteem motivations and socio-demographic disparities . . . . .	188
5.1	Employment conditions and strategic interaction in the labor market . . . . .	190
5.1.1	Workers' preferences on employment conditions and labor market functioning . . . . .	191
5.1.2	A model of strategic interaction in the labor market . . . . .	192
5.2	Market mechanisms and sociodemographic disparities . . . . .	194
5.2.1	The elements of the example . . . . .	194
5.2.2	No significant competition between employers (in the labor market) . . . . .	196
5.2.3	Competition between firms hiring officers . . . . .	200
	Summary and conclusion . . . . .	208
	Appendix . . . . .	209
5.3	The calculation of expected average earnings of groups 0 and 1 . . . . .	210
5.3.1	No significant competition between employers . . . . .	210
5.3.2	A shortage of agents of type 1 . . . . .	214
5.4	Characterization of equilibria in the presence of competitive pressures . . . . .	215
5.4.1	Shortage of agents of type 1 . . . . .	215
5.4.2	A global shortage of applicants $I_B = \frac{3}{2} \text{€}$ . . . . .	217
5.5	Attempt of a general formulation of labor market equilibrium . . . . .	221
5.5.1	The building of a best response function . . . . .	221
5.5.2	Labor market equilibrium . . . . .	223
	Conclusion . . . . .	226
